

Summer: Week 3

More Than and Fewer Than

When playing with their toys, encourage your child to sort them into groups e.g. they could sort their teddies by size, their bricks by colour or their cars by type. Once they have sorted them, compare the quantities of each group. Are there more big teddies or little teddies? Are there fewer red bricks or yellow bricks?

Put some counting objects in a bag or pot e.g. pom poms or buttons. Take it in turns to grab a handful and compare how many you have. Who has more? Who has fewer?

Go for a nature walk. Collect some natural objects e.g. leaves, sticks, pebbles, shells. When you get home, sort the objects and then count how many you have of each object. Compare the groups of objects. Do you have more sticks or leaves? Do you have fewer shells or pebbles?
